

To the Event Commemorating the Marion Lockdown

We join you in marking the anniversary of the Marion lockdown, honoring those who have suffered the long months and years of isolation, and who have resisted and struggled to bring an end to the cruelty of control units.

Many of us women political prisoners and Prisoners of War have spent time in the federal control units, and we can attest to the fact that control units = torture. So we join you in recognizing the extreme urgency of the campaign to shut down all control units. Our sense of urgency about this only grows as we experience the general worsening of prison conditions, and the damage to mind and body caused by these increasingly repressive and inhuman conditions.

Finally, we send our love and support to all those locked down in control units today, and especially to our brothers, the political prisoners and Prisoners of War in Florence, Pelican Bay, Westville, Marion; and too many more, such as the women isolated in the special housing unit in Marianna.

! HASTA LA VICTORIA SIEMPRE!

CLOSE THE CONTROL UNITS!
