

Dykes & Fags Come Out ...

Against Racism

- **US bombing of Iraq has caused thousands of deaths, injuries, and immense suffering to Iraqi civilians. The U.S. government and the media here fail to acknowledge these casualties, or they obscure the horror with video war-game images, because they consider Arab lives insignificant.**
- **The media has let loose a barrage of anti-Arab propaganda through stereotyping images, selective coverage and inventing Arab terrorist threats.**
- **Government, corporate and individual harassment of Arab people has included FBI interrogations, Pan Am's ban against Iraqis, vandalism and arson against Arab-owned businesses.**
- **People from the Black and Latino communities will fight and die in disproportionate numbers in the Gulf war defending the interests of a government that has rarely acted in their interests. Because of institutionalized racism people of color have few economic alternatives to military service.**

Against the "New World Order"

- **A "New World Order" was also proposed by Adolph Hitler, where Germany would be the dominant country in the world, and those who didn't fit in - like Queers, Jews, Communists, Gypsies, - would be exterminated.**
- **The "New World Order" means U.S. attempt to control the resources of Third World nations, like the oil in the Middle East. This will mean more violence and instability in the world.**
- **The "New World Order" means rampant militarism to maintain this "Order" abroad. Trillions of our tax dollars will continue to be spent on weapons at the expense of much needed social and health programs.**
- **The "New World Order" means more and bigger prisons, and more police invading Black, Latino and Native American communities to maintain the "Order" at home. Government control of disenfranchised people and dissenters will increase with the corresponding decrease in civil and political rights.**
- **The "New World Order" means increasing muscle for the religious right and a return to so-called "traditional values". These "values" encourage gay-bashing, violence against women, corporal punishment against children, rigid gender roles, racial segregation and other social diseases.**

For solutions to the Middle East crises

- **No U.S. weapons or military presence in the Gulf. Let the Arab people decide their own political and economic future.**
- **An end to all U.S. aid to Israel (currently more than \$10 million a day) until the occupation of the West Bank, Gaza, Golan Heights, and Southern Lebanon is ended.**
- **An end to further Israeli settlements in the occupied territories. Suspension of U.S./Israeli imposed restrictions which force emigrating Soviet Jews to go to Israel, thereby encouraging further settlements in the occupied territories.**
- **An international conference on Palestine, which includes the PLO, to solve the most destabilizing conflict in the Middle East.**

We want a society that is just at home and allows the rest of the world to define their own societies without U.S. interference.
