LESBIANS, GAY MEN and the GULF WAR

Lesbians and gay men are directly affected by the Gulf war. Why was this war started? Bush gives reasons, but we have no reason to trust him or the government. They have been lying to us and about us for years.

Don't be fooled! We need to fully understand the source of the various conflicts in the Middle East and the role that the U.S. plays in the region. As lesbians and gay men fighting for our own liberation, we realize the connections between our own movements and the struggles of people around the world for freedom and self-determination. We don't have all the answers. The situation changes daily. What we ask is that you inform yourself.

Arab Gay Men (AGMN) and Dykes and Gay Guys Emergency Response (DAGGER) present a public forum to the gay and lesbian community. Topics include historical analysis of the Gulf area up to the present time, its linkage to the Palestinian/Israeli conflict and the *intifada*, and its relevance to the lesbian and gay community. A panel of speakers and a slide show will address these issues, and there will be time for questions and answers.
